Press Release

Peikko delivers rock foundations to Sørkjord wind park in Norway

Peikko Group's Norwegian subsidiary Peikko Norge AS has received a substantial order from Sørkjord Vindpark AS for the delivery of rock foundation technology to a wind park project located in Nordland County, Northern Norway. Sørkjord Vindpark AS is fully owned by Fortum, a leading clean energy company developing and offering solutions for its customers in electricity, heating, and cooling, as well as solutions to improve resource efficiency.

Peikko will deliver all steel components for the 23 foundations of the Sørkjord wind park. The deliveries comprise FATBAR Rock Anchors, tower adapter plates, drilling templates, and foundation reinforcement. Peikko is also responsible for the foundation design and structural calculations. Deliveries are scheduled to take place between July and October 2018. The wind park is estimated to be operational by the second half of 2019.

Siemens-Gamesa Renewable delivers 23 pieces of SWT130-4.2 MW turbines with a hub height of 80 meters. Målselv Maskin & Transport AS has been assigned for the civil work and infrastructure construction. VISINOR will perform the technical assembly of foundation steel components as well as casting works of Peikko's rock-anchored foundations.

"Sørkjord Vindpark AS chose Peikko as the foundation technology provider as their solution is cost-effective and has a proven track record," states Torkjell Lund, Project Manager at Sørkjord Vindpark AS.

"Peikko's rock foundation is always tailored to the needs of the customer and the project. We have comprehensive experience in demanding onshore wind park projects, with both gravity and rock foundations. Peikko provides a complete solution including the design and supply of foundation components, bringing important savings for the project, and thus speeding up the erection process," comments Topi Paananen, CEO of Peikko Group Corporation.

Peikko's onshore wind turbine foundation system optimizes the use of steel and concrete and reduces time in all parts of the process. Our foundation solution is flexible; it is always tailored according to customer and project needs. The delivery can comprise foundation components, design and foundation components or the complete turnkey foundation including assembly.

Peikko Group in brief:

Peikko Group Corporation is a leading global supplier of concrete connections and composite structures. Peikko's innovative solutions make customers' building processes faster, easier, and more reliable.
