HYPOTHESIS XV Cape Town 2020 South Africa

HYdrogen POWER THEoretical & Engineering Solutions International Symposium

The Organising Committee of HYPOTHESIS XV is proud to invite you to Cape Town, South Africa, for its first event on the African continent.

This event will offer a diverse, relevant and cutting-edge scientific programme and unprecedented networking possibilities for anyone wishing to connect with experts from Africa and beyond.

The purpose of the HYPOTHESIS series is to provide a forum where representatives from industry, public laboratories, universities and governmental agencies can meet, discuss and present the most recent advances in hydrogen technology. The conference will address all aspects, theoretical, experimental and prototype developments, of hydrogen as an energy carrier.

Topics:

- Hydrogen production from conventional fossil sources
- Hydrogen production from wastes and residual biomass
- Electrolysis and other hydrogen production technologies from renewable energy sources
- Hydrogen separation and purification
- Hydrogen storage: chemical carriers, hydrides, gas, liquefaction
- Hydrogen infrastructure, distribution, filling stations
- Fuel cells technologies and their applications
- Thermal and combustion applications
- Power to fuel technologies
- Life cycle assessment and sustainability of hydrogen energy
- Hydrogen economy
- Safety, standards and regulations
- Roadmaps and policies

Key dates

- Abstract submission deadline: October 31, 2019
- Notification for abstracts acceptance: January 15, 2020
- Early bird registration: January 31, 2020
- Conference: May 3-6, 2020

We kindly invite you to join us on May 3-6 2020, for a memorable time in HYPOTHESIS XV in Cape Town (South Africa).
