

### How to Market Algae Products & Applications whilst Working Together as an Industry and Attracting Durable Investments

Following the success of its previous editions, ACI's 9<sup>th</sup> **European Algae Industry Summit** (10–11 April, 2019 – Lisbon, Portugal) will explore the ongoing developments of **the algae industry**.

This new edition will focus on how to market the various algae-based products & applications, with case studies from key actors of each segments bringing forward their experience.

The conference will also take an in-depth look into two important themes: how can the industry work together towards standardisation & regulation for products, and specifically food products; and on the other hand, how to attract investments and create beneficial partnerships. These two topics will be discussed through interactive panel discussions, to ensure a positive exchange with all industry actors involved.

The two day event will offer an in-depth look into the **technologies supporting the industry**. And the participants will also have the chance to discuss how to **keep the industry thriving as a whole** during the numerous Q&As, and the extended networking breaks.

Join us in **Lisbon** for a **highly interactive & informative conference**, whilst enjoying the **networking opportunities with your peers**.

Have a look at the dedicated tab below to find out more about our Exclusive Site Visit at **ALGATEC Eco Business Park Plant** on Tuesday 9th April.

#### Who Will Attend?

- Algae end market users in cosmetics, flavours, nutrition, animal feed, food and many more
- Algae producers & cultivation plant owners and operators
- Leading algae/biomass research institutes, technology providers for cultivation, harvesting, dewatering, drying, oil extraction and processing
- Plant engineers and constructors, biofuel producers and green energy & biotech investors
- Venture capitalists and financial investors for biotechnology & food industries

#### Key Topics:

- State of the Industry: Current Outlook & Predictions
- Regulation & Standardisation: Moving towards Clearer Guidelines to Encourage Products Development
- Financing & Partnering: Investors Perspectives on Strategy & Expansion
- New Developments in Process Technologies
- Emerging End-Market: Algae-Based Chemicals & Materials
- Marketing Efficiently Algae Novel Food & Nutritional Products
- Highlighting the Sustainable Quality of Algae for Animal Feed
- Exploring Best Practices of Algae Used in Agricultural Products
- Exploring the Use of Algae for Cosmetics

During the Tuesday afternoon, prior to the conference, a limited number of conference delegates will receive the unique opportunity to visit the brand new ALGATEC Eco Business Park, just a short drive from Lisbon.

The ALGATEC Eco Business Park, developed by the A4F – Algae for Future group in collaboration with LusoAmoreiras and Solvay, envisions the installation of a 14.2 ha integrated platform with microalgae production and processing units in an excellent geographical location in Europe, with high solar radiation, water sources and raw materials availability.

ALGATEC Eco Business Park based in Portugal started its construction in 2017 and will be one of the largest microalgae production centers in Europe. Currently, has in the pipeline the development and implementation of three innovative projects with cutting-edge technologies for the production of microalgae and microalgal extracts to be used in the feed and food industry.

The proximity to universities and research institutes will allow the development of a cluster to support the entrepreneurs and investors in the field of microalgae with the process of knowledge-transfer between applied research, industrial production, product development and commercialisation.

The installation of ALGATEC Eco Business Park will be an essential step in strengthening a sustainable circular economy and national industrial cluster, with the first integrated park dedicated to the installation of algae biotechnology projects, based on sustainable technological development in its environmental, economic and social aspects.

There is **no extra charge** to attend the site visit, but spaces are limited and allocated to the conference delegates on a **first come first served basis**. Therefore, we would strongly suggest to book your place early to avoid disappointment.  
Please note that, due to compliance reasons, attendance is subject to approval from A4F – Algae for Future.

**Details**

**Start:**  
10th April 2019  
**End:**  
11th April 2019  
**Event Categories:**  
Agriculture, Cosmetics, Renewables

**European Fuels Markets & Refining Strategy Conference  
– Sustainable Refining  
in The Energy Transition Context**

Already on the 3rd edition of successful series, ACI’s is pleased to announce the next edition of **European Fuels Markets & Refining Strategy Conference** set in **Frankfurt, Germany**, on the on the **27th and 28th of March**.

The event will bring together senior executives and experts from the refining industry, policy makers, consultants, technology innovators and leading market analysts to discuss the latest challenges and developments within the industry.

The two day event will give you an insight to the industry’s latest regulations impacting on **refining sustainability**, **global transition in energy trends** & future forecasts on **fuel demand, export & trading activities**. In depth insights into the European **‘Vision 2020 – 2050’**, **MARPOL** regulation & impact of **Electric Vehicles** will provide a solid background for the two days discussion on best solutions for refining in Europe.

Join us hear from top industry experts analysing the future of the refining strategy in Europe: **integrating refining & petrochemical plants**, aiming for greater **fuel quality**, finding the best solutions to respond to the **electrification trends** & evaluation of **new investment paths** in the light of ongoing **decarbonisation trends**.

**During the afternoon of Tuesday 26th of March 2019, a limited number of conference attendees will receive a unique opportunity to visit MIRO Refinery in Karlsruhe, Germany.** The plant is the largest oil refinery in Germany and one of the most advanced and powerful in Europe.

**Who Will Attend?**

- Senior refining industry representatives
- Industry’s analysts
- Technology Innovators and developers
- Top industry’s Consultants
- Regulatory and Policy Officers
- Environmental Organisations
- Researchers

The 2019 **key discussion topics** brought by the agenda committee, join us in Frankfurt do discuss:

- Analysing European Policy Direction Of The Future: Being Prepared For New Refining Obligations
- Evaluating Refining Investment Paths 2020–2050: Addressing Low Carbon Economy Pressure In European Refining
- Finding Best Solutions For Sustainable Refining: Making The Most Of Emerging Technologies
- In Search For Effective & Efficient Alternatives To Electro – Mobility: Refining Solutions Towards Transport De-carbonization
- Forecasting The Future Of Fuel Demand: Global & European Perspectives
- Unification Of Refining & Petrochemical Plants: Aiming For Greater Product Specification
