

June, 2019 will mark the arrival ACI's third European Environmental Ports Conference. The event will bring together senior representatives from the global port community and shipping companies, as well as environmental policy-makers, academic experts, consultants, and technology providers, to tackle the most pressing topics of the maritime industry.

Given the increasing focus on environmental regulations from the IMO and policy makers in the maritime sector, there is a growing responsibility and requirement of ports to reduce their environmental impact; now is a crucial time to share best practices and explore new technologies and methodologies in order to advance daily operations of a port with minimal ecological consequences.

On the 12<sup>th</sup> and 13<sup>th</sup> of June 2019, this two-day event will provide informative presentations on the very latest challenges, solutions and developments in reducing emissions, pollution and energy consumption, as well as discussing the possibilities of industrial collaboration and a more sustainable future.

#### Exclusive Site Visit:

In addition to the main two day event on Tuesday, 11th of June, a day prior the conference a limited number of conference delegates will have a unique opportunity to join an exclusive site visit to the Port of Antwerp. There is no extra charge to join the site visit, although places are limited and allocated to the conference delegates on first come first served basis. Therefore, we would strongly suggest to book your place early to avoid disappointment.

#### Key Topics Include

- The Ten Biggest Concerns of the Ports Industry
- Anticipating Changes to Environmental Legislation
- Research & Development for Improving Air Quality Around Ports
- Potential Impact of the 2019 European Elections towards the Industry
- Outlining the Importance of the Water Framework Directive
- Port-City Interaction and Collaboration for a Sustainable Economy
- Ship-Owners and their Role Towards an Environmentally Green Future
- Innovative Approaches to Long-Term Fuel Possibilities
