

FORECASTS FOR THE NEXT SOLAR ACTIVITY CYCLE AND DYNAMO THEORY

KRISTOF PETROVAY

Eötvös University, Department of Astronomy, Budapest, Hungary, e-mail:
K.Petrovay@astro.elte.hu

Proposed empirical and theoretical regularities and patterns underlying the sunspot cycle record will be reviewed, with special emphasis on recent model-based prediction attempts for cycle 24 and on nonlinear vs. stochastic mechanisms for producing grand minima/maxima.

dynamo, solar cycle, solar activity
