

WORLD MAP OF MAGNETIC OBSERVATORIES: 2009

PETER J. CHI

Institute of Geophysics and Planetary Physics, University of California, Los Angeles, USA, e-mail: pchi@igpp.ucla.edu

This poster presents the locations of all operating magnetometer stations in the world. Constructed and maintained by many organizations and projects across the globe, these magnetometer stations collect magnetic field measurements that are invaluable to both geomagnetic and heliophysics research. Corrections and suggestions on available stations are welcome and can be directed to the author for future updates. This world map of magnetometer stations is created in part to facilitate research collaborations in the IAGA ULF Waves Working Group.
